

**Povio  
Academy  
Conference**

The background features a dark blue gradient with several teal-colored geometric elements. On the left, there is a large teal triangle pointing to the right. In the center, there is a teal triangle pointing upwards. On the right, there is a teal triangle pointing to the left. Additionally, there are several overlapping teal semi-circular arcs that create a sense of depth and movement across the top and right sides of the slide.

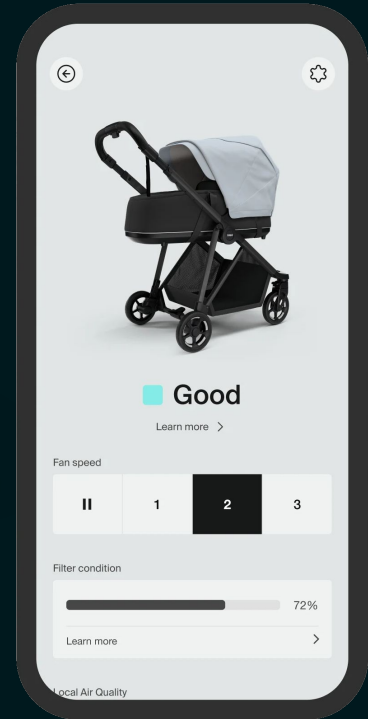

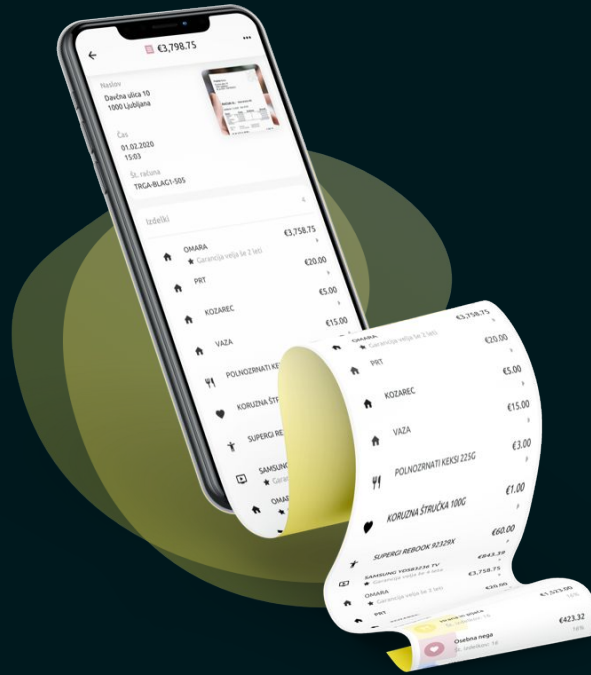

# **From Web to Mobile: Exploring New Horizons**

Matej Hočevar

**trætton37**

# About Me

- Full-stack developer by 
- Lead Software Engineer @ tretton37
- Cross-platform mobile developer

# trætton37

## Swedish technology consultancy with knowledge in our DNA

With our **unique knowledge sharing and empathic approach to mentorship**, we make sure our clients and our employees grow beyond their aspirations.

# How I started

A startup company with three teams working together on a mobile banking app in 2018.

# The Challenge

**14****Days**

Rapidly prototype MVP with a team of three web developers under tight deadlines.

**3****Frameworks**

Evaluate technical capabilities using most popular cross-platform frameworks.

**1****Codebase**

Single codebase for iOS & Android platform with minimal platform-specific code.

**4****Screens**

Prioritize implementation of most business critical screens.

**0****Differences**

Ensure seamless user experience indistinguishable from existing native apps.

# The Result?

# The Result?

Framework	NativeScript	React Native	Flutter
Custom layout	★★★★☆	★★★★☆	★★★★☆
Plugins	★★★★☆	★★★★☆	★★★★☆
Performance	★★★★☆	★★★★☆	★★★★☆
Documentation & Community	★★★★☆	★★★★☆	★★★★☆
Developer Experience	★★★★☆	★★★★☆	★★★★☆

# Takeaways?

The journey of a  
thousand miles  
begins with a single  
step. That still  
leaves you with a  
long way to go.

# Many ways to build an app

- Native
  - iOS
  - Android
- Cross-Platform frameworks
  - React Native
  - Flutter
  - and many others
- PWA

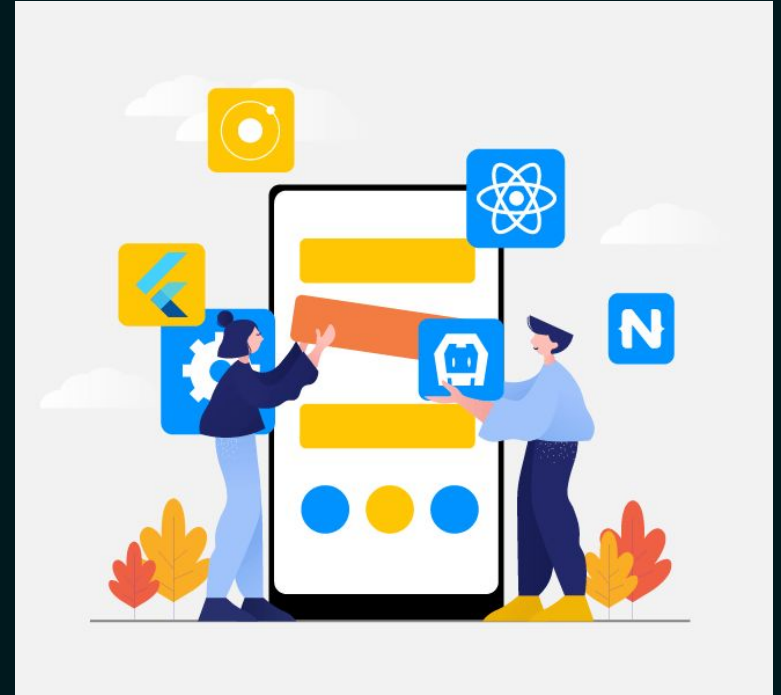

# Native App Development

- New programming language
- Great performance
- Plenty of native API
- Built-in support for Simulators, Emulators
- Debugging resources

When to choose it:

- Extensive integration with native APIs
- Performance is crucial
- App size matters
- Existing team of app developers
- Comfortable budget

# iOS with Swift

- Language: Swift
- UI framework: SwiftUI
- Backed by: Apple
  
- Xcode with macOS required
- Native APIs not open-sourced

```
poviocademy.swift

import SwiftUI

struct ContentView: View {
    var body: some View {
        VStack {
            Text("Welcome to")
                .foregroundColor(Color.gray)
                .padding(.bottom, 16)

            Text("Povio Academy")
                .foregroundColor(Color.white)
                .padding(.bottom, 32)

            Image("povio-academy")
                .resizable()
                .aspectRatio(contentMode: .fit)
                .padding(32)
        }
        .background(Color(hex: "#03191f"))
    }
}
```

# Android with Kotlin

- Language: Kotlin
- UI framework: Jetpack Compose
- Backed by: Google, JetBrains
  
- Compatibility with Java
- Tooling support

```
PovioAcademy.kt

import androidx.compose.foundation.Image

                contentScale = ContentScale.Fit,
                modifier = Modifier.fillMaxWidth().padding(top = 32.dp)
            )
        }
    }
}
```

# Cross-Platform Development

- Single codebase
- Quicker development process (50-80 %)
- Reusable code (> 90 %)
- Unified look & feel
- Reduce development cost

# React Native with JavaScript

- Everything is a component
- JavaScript is compiled to native code

Web Browser	React Native JSX	Native Android	Native iOS
<div>	<View>	android.View	UIView
<input>	<TextInput>	EditText	UITextField
...	...	...	...

- Platform-specific look & feel
- Hot reload, Live Reload
- Supports iOS, Android, Desktop\*, Web\*

```
PovioAcademy.js

import React from 'react';
import { View, Text, Image, StyleSheet } from 'react-native';

const App = () => {
  return (
    <View style={styles.container}>
      <Text style={[styles.text, styles.grayText]}>Welcome to</Text>
      <Text style={[styles.text, styles.whiteText]}>Povio Academy</Text>
      <Image source={require('./povio-academy.png')} style={styles.image} />
    </View>
  );
};

const styles = StyleSheet.create({
  container: {
    flex: 1,
    backgroundColor: '#03191f',
    padding: 32,
    justifyContent: 'center',
    alignItems: 'center',
  },
  text: {
    marginBottom: 16,
    textAlign: 'center',
  },
  grayText: {
    color: '#808080',
  },
  whiteText: {
    color: '#FFFFFF',
    marginBottom: 32,
  },
  image: {
    width: '100%',
    aspectRatio: 1,
  },
});

export default App;
```

# React Native with JavaScript

## Pros:

- Large community
- Leverage web skills
- Expo platform wrapper  
(UI components, SDK, Client, OTA updates)

## Cons:

- Dependency on 3rd-party libraries
- Bridge might be performance bottleneck

```
PovioAcademy.js

import React from 'react';
import { View, Text, Image, StyleSheet } from 'react-native';

const App = () => {
  return (
    <View style={styles.container}>
      <Text style={[styles.text, styles.grayText]}>Welcome to</Text>
      <Text style={[styles.text, styles.whiteText]}>Povio Academy</Text>
      <Image source={require('./povio-academy.png')} style={styles.image} />
    </View>
  );
};

const styles = StyleSheet.create({
  container: {
    flex: 1,
    backgroundColor: '#03191f',
    padding: 32,
    justifyContent: 'center',
    alignItems: 'center',
  },
  text: {
    marginBottom: 16,
    textAlign: 'center',
  },
  grayText: {
    color: '#808080',
  },
  whiteText: {
    color: '#FFFFFF',
    marginBottom: 32,
  },
  image: {
    width: '100%',
    aspectRatio: 1,
  },
});

export default App;
```

# React Native with JavaScript

When to choose it:

- Rapid development & MVP delivery
- Team with web background
- Existing React.js codebase
- Frequent updates (code push)
- Limited budget

```
PovioAcademy.js

import React from 'react';
import { View, Text, Image, StyleSheet } from 'react-native';

const App = () => {
  return (
    <View style={styles.container}>
      <Text style={[styles.text, styles.grayText]}>Welcome to</Text>
      <Text style={[styles.text, styles.whiteText]}>Povio Academy</Text>
      <Image source={require('./povio-academy.png')} style={styles.image} />
    </View>
  );
};

const styles = StyleSheet.create({
  container: {
    flex: 1,
    backgroundColor: '#03191f',
    padding: 32,
    justifyContent: 'center',
    alignItems: 'center',
  },
  text: {
    marginBottom: 16,
    textAlign: 'center',
  },
  grayText: {
    color: '#808080',
  },
  whiteText: {
    color: '#FFFFFF',
    marginBottom: 32,
  },
  image: {
    width: '100%',
    aspectRatio: 1,
  },
});

export default App;
```

# Flutter with Dart

- Everything is a widget
- Own rendering engine
- Consistent UI across platforms
- Supports iOS, Android, Web, Desktop (Windows, macOS, Linux) & embedded devices

```
PovioAcademy.dart

import 'package:flutter/material.dart';

void main() {
  runApp(MyApp());
}

class MyApp extends StatelessWidget {
  @override
  Widget build(BuildContext context) {
    return MaterialApp(
      home: Scaffold(
        body: Container(
          color: Color(0xFF03191F),
          padding: EdgeInsets.all(32),
          child: Center(
            child: Column(
              mainAxisAlignment: MainAxisAlignment.center,
              children: [
                Text(
                  'Welcome to',
                  style: TextStyle(color: Colors.grey),
                ),
                SizedBox(height: 16),
                Text(
                  'Povio Academy',
                  style: TextStyle(color: Colors.white),
                ),
                SizedBox(height: 32),
                Image.asset(
                  'assets/povio-academy.png',
                  width: double.infinity,
                  fit: BoxFit.fitWidth,
                ),
              ],
            ),
          ),
        ),
      ),
    );
  }
}
```

# Flutter with Dart

## Pros:

- Smaller but strong community
- High-performance animations and custom UI designs
- Dart (Null-safety)

## Cons:

- New language: Dart
- Fewer developers
- Material UI is the dominant design system
- No out-of-the-box OTA updates

```
PovioAcademy.dart

import 'package:flutter/material.dart';

void main() {
  runApp(MyApp());
}

class MyApp extends StatelessWidget {
  @override
  Widget build(BuildContext context) {
    return MaterialApp(
      home: Scaffold(
        body: Container(
          color: Color(0xFF03191F),
          padding: EdgeInsets.all(32),
          child: Center(
            child: Column(
              mainAxisAlignment: MainAxisAlignment.center,
              children: [
                Text(
                  'Welcome to',
                  style: TextStyle(color: Colors.grey),
                ),
                SizedBox(height: 16),
                Text(
                  'Povio Academy',
                  style: TextStyle(color: Colors.white),
                ),
                SizedBox(height: 32),
                Image.asset(
                  'assets/povio-academy.png',
                  width: double.infinity,
                  fit: BoxFit.fitWidth,
                ),
              ],
            ),
          ),
        ),
      ),
    );
  }
}
```

# Flutter with Dart

When to choose it:

- Rapid development & MVP delivery
- Highly customized UI/UX
- Consistent UI across platforms
- Multiple platforms (Mobile + Web, Desktop, embedded)
- Limited budget

```
PovioAcademy.dart

import 'package:flutter/material.dart';

void main() {
  runApp(MyApp());
}

class MyApp extends StatelessWidget {
  @override
  Widget build(BuildContext context) {
    return MaterialApp(
      home: Scaffold(
        body: Container(
          color: Color(0xFF03191F),
          padding: EdgeInsets.all(32),
          child: Center(
            child: Column(
              mainAxisAlignment: MainAxisAlignment.center,
              children: [
                Text(
                  'Welcome to',
                  style: TextStyle(color: Colors.grey),
                ),
                SizedBox(height: 16),
                Text(
                  'Povio Academy',
                  style: TextStyle(color: Colors.white),
                ),
                SizedBox(height: 32),
                Image.asset(
                  'assets/povio-academy.png',
                  width: double.infinity,
                  fit: BoxFit.fitWidth,
                ),
              ],
            ),
          ),
        ),
      ),
    );
  }
}
```
